

Sinclair Broadcasting's decision to force all of its affiliate stations to run an anti-Kerry ad two weeks before the elections is a misuse of the public air space and I believe Sinclair should be investigated by the FCC regarding their license. Further, the consolidation of media ownership is a threat to our democracy as evidenced by Sinclair's overt use of the broadcasting medium to spread their partisan bias. The FCC must demand that media ownership lives up to the commitment to serve the public if they are given rights from the public to the use of the air waves.
